ABOUT ME

FULL-STACK DEVELOPMENT | SOFTWARE ENGINEERING | WEB DEVELOPMENT | UI DESIGN

I first discovered my love for programming in 2021 when a Pharmacist I worked with who knew I wanted a CS degree encouraged me to teach myself programming. I had so much fun writing code and figuring out how applications were structured and figuring out creative solutions to problems. The more I learn the more I feel like I can create anything.

Im now a Full-stack developer with a combination of knowledge and experience in web application development, requirements gathering, and system analysis. Adept at partnering with business units to improve efficiency and remove barriers in applications, develop new product ideas, designs, prototypes, estimates, and maintain coding standards.
